1 Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris.

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac

quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et nunciam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.TODO!

The remainder of the paper starts with a presentation of related work (Sect. 2). It is followed by a presentation of hints on L^AT_EX (Sect. 3). Finally, a conclusion is drawn and outlook on future work is made (Sect. 4).

2 Related Work

Winery [2] is a graphical modeling tool. The whole idea of TOSCA is explained by Binz et al. [1].

3 LaTeX Hints

This section contains hints on writing LaTeX. It focuses on minimal examples, which can be directly adapted to the content

3.1 Handling of paragraphs

One sentence per line. This rule is important for the usage of version control systems. A new line is generated with a blank line. As you would do in Word: New paragraphs are generated by pressing enter. In LaTeX, this does not lead to a new paragraph as LaTeX joins subsequent lines. To start a new paragraph, press enter twice. This leads to an empty line. In word, there is the functionality to press shift and enter. This leads to a hard line break. The text starts at the beginning of a new line. In LaTeX, you can do that by using two backslashes (`\\`).

This is rarely used.

Please do *not* use two backslashes for new paragraphs. For instance, this sentence belongs to the same paragraph, whereas the last one started a new one. A long motivation for that is provided at <http://loopspace.mathforge.org/HowDidIDoThat/TeX/VCS/#section.3>.

Corresponding L^AT_EX code of ./paper.tex

```

696 æŒúŮŮŮ
697 One sentence per line.
698 This rule is important for the usage of version control systems.
699 A new line is generated with a blank line.
700 As you would do in Word:
701 New paragraphs are generated by pressing enter.
702 In LaTeX, this does not lead to a new paragraph as LaTeX joins
    ↪ subsequent lines.
703 To start a new paragraph, press enter twice.
704 This leads to an empty line.
705 In word, there is the functionality to press shift and enter.
706 This leads to a hard line break.
707 The text starts at the beginning of a new line.
708 In LaTeX, you can do that by using two backslashes
    ↪ (\textbackslash\textbackslash).
709 \\
710 This is rarely used.
711
712 Please do \textit{not} use two backslashes for new paragraphs.
713 For instance, this sentence belongs to the same paragraph,
    ↪ whereas the last one started a new one.
714 A long motivation for that is provided at
    ↪ \url{http://loopspace.mathforge.org/HowDidIDoThat/TeX/VCS/#section.3}.

```

3.2 Notes separated from the text

The package mindflow enables writing down notes and annotations in a way so that they are separated from the main text.

This is a small note.

Corresponding L^AT_EX code of ./paper.tex

```

721 æŒúŮŮŮ
722 \begin{mindflow}
723 This is a small note.
724 \end{mindflow}

```

3.3 Handling TODOs

Marked text.

Corresponding L^AT_EX code of ./paper.tex

```

729 æƒüŰŰŰ
730 \textmarker{Marked text.}

```

With `\textmarker`, only the text color is changed, since this also works well for individual words.

Marked text.

Corresponding L^AT_EX code of ./paper.tex

```

735 æƒüŰŰŰ
736 \textcomment{Marked text.}{A comment on it.}

```

Manual marking for text that has been changed since the last version.

Corresponding L^AT_EX code of ./paper.tex

```

739 æƒüŰŰŰ
740 \modified{Manual marking for text that has been changed since
    ↪ the last version.}

```

This is some text. Changed text.

Corresponding L^AT_EX code of ./paper.tex

```

743 æƒüŰŰŰ
744 This is some text.
745 \change{FL1: text adjusted}{Changed text}.

```

Here is a comment.

Corresponding L^AT_EX code of ./paper.tex

```

748 æƒüŰŰŰ
749 Here is a comment\sidecomment{Comment}.

```

TODO!

Corresponding L^AT_EX code of ./paper.tex

```

752 æƒüŰŰŰ
753 \todo{A lot of text still needs to be produced here}

```

3.4 Hyphenation

L^AT_EX automatically hyphenates words. When using microtype, there should be fewer hyphenations than in other settings. You might still need to tweak the hyphenation. Here are some hints:

In case you write “application-specific”, then the word will only be hyphenated at the dash. You can also write `applica\allowbreak{}tion-specific` (result: application-specific), but this is much more effort.

You can now write words containing hyphens which are hyphenated at other places in the word. For instance, `application"=specific` gets application”=specific. This is enabled by an additional configuration of the babel package.

Corresponding L^AT_EX code of ./paper.tex

```

763 æŒúŮőŰ
764 In case you write \enquote{application-specific}, then the word
    ↪ will only be hyphenated at the dash.
765 You can also write \verb1applica\allowbreak{}tion-specific1
    ↪ (result: applica\allowbreak{}tion-specific), but this is
    ↪ much more effort.
766
767 You can now write words containing hyphens which are hyphenated
    ↪ at other places in the word.
768 For instance, \verb1application"=specific1 gets
    ↪ application"=specific.
769 This is enabled by an additional configuration of the babel
    ↪ package.

```

3.5 Typesetting Units

Numbers can be written plain text (such as 100), by using the siunitx package as follows: $100 \frac{\text{km}}{\text{h}}$, or by using plain L^AT_EX (and math mode): $100 \frac{km}{h}$.

Corresponding L^AT_EX code of ./paper.tex

```

774 æŒúŮőŰ
775 Numbers can be written plain text (such as 100), by using the
    ↪ \href{https://ctan.org/pkg/siunitx}{siunitx} package as
    ↪ follows:
776 \SI{100}{\km\per\hour},
777 or by using plain \LaTeX{} (and math mode):
778 $100 \frac{\mathit{km}}{h}$.

```

5 % of 10 kg

Corresponding L^AT_EX code of ./paper.tex

781 æƒüŦŦŦ
782 \SI{5}{\percent} of \SI{10}{kg}

Numbers are automatically grouped: 123 456.

Corresponding L^AT_EX code of ./paper.tex

785 æƒüŦŦŦ
786 Numbers are automatically grouped: \num{123456}.

3.6 Surrounding Text by Quotes

Please use the “enquote command” to quote something. Quoting with “quote” or “quote” also works.

Corresponding L^AT_EX code of ./paper.tex

791 æƒüŦŦŦ
792 Please use the \enquote{enquote command} to quote something.
793 Quoting with "`quote'" or ``quote'' also works.

3.7 Zref-clever examples

zref-clever demonstration: Zcref (short for zcref[S]) at beginning of sentence, zcref in all other cases.

Heading1 Heading2	
One	Two
Thee	Four

Table 1. Example table for zcref demo

Figure 1 shows a simple fact, although Fig. 1 could also show something else.
Table 1 shows a simple fact, although Table 1 could also show something else.
Section 3.7 shows a simple fact, although Sect. 3.7 could also show something else.

Fig. 1. Example figure for zceref demo

Corresponding L^AT_EX code of ./paper.tex

```

823 œEüŰöŰ
824 \Zceref{fig:ex:ceref} shows a simple fact, although
      ⇨ \zceref{fig:ex:ceref} could also show something else.
825
826 \Zceref{tab:ex:ceref} shows a simple fact, although
      ⇨ \zceref{tab:ex:ceref} could also show something else.
827
828 \Zceref{sec:ex:ceref} shows a simple fact, although
      ⇨ \zceref{sec:ex:ceref} could also show something else.

```

3.8 Theorem-like Environments and Mathematics

The `llncs` class already provides the theorem-like environments `theorem`, `proposition`, `lemma`, `corollary`, `definition`, `example`, `exercise`, `note`, `problem`, `question`, `remark`, and `solution` as well as the unnumbered `proof` environment – no additional package is required.

Definition 1 (Idempotence). *An operation f is idempotent if $f(f(x)) = f(x)$ holds for all inputs x .*

Proposition 1. *The identity operation is idempotent.*

Lemma 1. *An idempotent operation fixes every element of its image.*

Theorem 1. *If two idempotent operations f and g commute, their composition $f \circ g$ is idempotent.*

Proof. Since f and g commute and are idempotent,

$$(f \circ g)((f \circ g)(x)) = f(f(g(g(x)))) = f(g(x)) = (f \circ g)(x). \quad (1)$$

□

Corollary 1. *Applying $f \circ g$ a second time yields no further change, as Eq. (1) shows.*

Example 1. Trimming spaces in a string is idempotent: Lemma 1 applies to every already-trimmed string.

Corresponding L^AT_EX code of ./paper.tex

```

835 %\begin{document}
836 \begin{definition}[Idempotence]
837   An operation  $f$  is \emph{idempotent} if  $f(f(x)) = f(x)$ 
838    $\hookrightarrow$  holds for all inputs  $x$ .
839 \end{definition}
840 \begin{proposition}
841   The identity operation is idempotent.
842 \end{proposition}
843 \begin{lemma}\label{lem:fixed}
844   An idempotent operation fixes every element of its image.
845 \end{lemma}
846 \begin{theorem}\label{thm:idempotent-composition}
847   If two idempotent operations  $f$  and  $g$  commute, their
848    $\hookrightarrow$  composition  $f \circ g$  is idempotent.
849 \end{theorem}
850 \begin{proof}
851 \begin{proof}
852   Since  $f$  and  $g$  commute and are idempotent,
853   \begin{equation}
854     (f \circ g)(f \circ g)(x) =
855     \hookrightarrow f(g(f(g(x)))) = f(g(x)) = (f \circ g)(x).
856   \end{equation}
857   \label{eq:idempotent-composition}
858   \qed
859 \end{proof}
860 \begin{corollary}
861   Applying  $f \circ g$  a second time yields no further change,
862    $\hookrightarrow$  as \zcref{eq:idempotent-composition} shows.
863 \end{corollary}
864 \begin{example}
865   Trimming spaces in a string is idempotent: \zcref{lem:fixed}
866    $\hookrightarrow$  applies to every already-trimmed string.
867 \end{example}

```

3.9 Figures

Figure 2 shows something interesting.

Fig. 2. Simple Figure. Based on Scharrer [3].

891   \includegraphics[width=.29\linewidth]{example-image-a}
892   \caption{A floating figure}
893 \end{floatingfigure}
894 \lipsum[2]

```

3.10 Sub Figures

An example of two sub figures is shown in Fig. 4.

Fig. 4. Example figure with two sub figures.

Corresponding L^AT_EX code of ./paper.tex

```

901 %\begin{figure}
902 \begin{figure}[!b]
903   \centering
904   \subfloat[Case
     ↪ I]{\includegraphics[width=.4\linewidth]{example-image-a}%
905     \label{fig:first_case}}
906   \hfil
907   \subfloat[Case
     ↪ II]{\includegraphics[width=.4\linewidth]{example-image-b}%
908     \label{fig:second_case}}
909   \caption{Example figure with two sub figures.}
910   \label{fig:two_sub_figures}
911 \end{figure}

```

3.11 Figures with tikz

The tikz package creates graphics programmatically. This package generates grids and other regular structures.

Fig. 5. A regular grid generated easily with two for loops.

Corresponding L^AT_EX code of ./paper.tex

```

919 \begin{figure}[ht]
920   \centering
921   \begin{tikzpicture}
922     \draw(0,0) rectangle (4,4);
923     \foreach \x in {0.5,1,1.5,2,2.5,3,3.5}
924       \foreach \y in {0.5,1,1.5,2,2.5,3,3.5}
925         \draw(\x,\y) circle (1pt);
926   \end{tikzpicture}
927   \caption{A regular grid generated easily with two for
928     ↪ loops.}\label{fig:tikz_example}
929 \end{figure}

```

3.12 Plots with pgfplots

The pgfplots package plots functions directly in L^AT_EX, similar to MATLAB or gnuplot. Some visual examples are available in the package documentation¹.

Fig. 6. Plot of $\sin(x)$ directly inside the figure environment with pgfplots.

¹ <http://texdoc.net/pkg/pgfplots>

Corresponding L^AT_EX code of ./paper.tex

```

937 \begin{figure}[ht]
938   \centering
939   \begin{tikzpicture}
940     \begin{axis}[xlabel=$x$, ylabel=$\sin(x)$]
941       \addplot {sin(deg(x))}; % Plot the sine function
942     \end{axis}
943   \end{tikzpicture}
944   \caption{Plot of $\sin(x)$ directly inside the figure
945     ↪ environment with pgfplots.}
946   \label{fig:pgfplots_example}
947 \end{figure}

```

Coordinates can also be given explicitly instead of as a function:

Fig. 7. Explicit coordinates plotted with pgfplots.

Corresponding L^AT_EX code of ./paper.tex

```
951 %EüÜöŮ
952 \begin{figure}[ht]
953   \centering
954   \begin{tikzpicture}
955     \begin{axis}[xlabel=$x$, ylabel=$y$]
956       \addplot coordinates {(0,0) (1,1) (2,4) (3,9)}; % Plot
957       \end{axis}
958     \end{tikzpicture}
959     \caption{Explicit coordinates plotted with pgfplots.}
960     \label{fig:pgfplots_coords}
961 \end{figure}
```

3.13 Tables

1093     language=Java,
1094     float]
1095 public class Hello {
1096     public static void main (String[] args) {
1097         System.out.println("Hello World!");
1098     }
1099 }
1100 \end{lstlisting}
```

3.16 Itemization

One can list items as follows:

- Item One
- Item Two

Corresponding L^AT_EX code of ./paper.tex

```
1107 %\documentclass{article}
1108 \begin{itemize}
1109   \item Item One
1110   \item Item Two
1111 \end{itemize}
```

One can enumerate items as follows:

1. Item One
2. Item Two

Corresponding L^AT_EX code of ./paper.tex

```
1117 %\documentclass{article}
1118 \begin{enumerate}
1119   \item Item One
1120   \item Item Two
1121 \end{enumerate}
```

With paralist, one can even have all items typeset after each other and have them clean in the TeX document:

1. All these items... 2. ...appear in one line 3. This is enabled by the paralist package.

Corresponding L^AT_EX code of ./paper.tex

```
1127 %\documentclass{article}
1128 \begin{inparaenum}
1129   \item All these items...
1130   \item ...appear in one line
1131   \item This is enabled by the paralist package.
1132 \end{inparaenum}
```

3.17 Other Features

The words “workflow” and “dwarflike” can be copied from the PDF and pasted to a text file.

Corresponding L^AT_EX code of ./paper.tex

```

1137 æEuÛöŦ
1138 The words \enquote{workflow} and \enquote{dwarflike} can be
      ↪ copied from the PDF and pasted to a text file.

```

The symbol for powerset is now correct: $\wp$ and not a Weierstrass p ($\wp$).

$\wp(1, 2, 3)$

Corresponding L^AT_EX code of ./paper.tex

```

1141 æEuÛöŦ
1142 The symbol for powerset is now correct:  $\wp$  and not a
      ↪ Weierstrass p ( $\wp$ ).
1143
1144  $\wp(\{1, 2, 3\})$ 

```

Brackets work as designed: <test> One can also input backticks in verbatim text: ``test``.

Corresponding L^AT_EX code of ./paper.tex

```

1147 æEuÛöŦ
1148 Brackets work as designed:
1149 <test>
1150 One can also input backticks in verbatim text: \verb|`test`|.

```

Acronyms can be typeset in running text with `\initialism`, which sets them as small caps that blend into the surrounding lowercase text. It is the lightweight alternative to the full acronym and glossary management (`\gls`, with an automatic list of abbreviations) provided by the thesis variants: `\initialism` only typesets the acronym and does not add it to any list. The macro and a few ready-made acronyms (`\OMG`, `\BPEL`, `\BPMN`, `\UML`) are defined in `commands.tex`, where you can add your own.

The UML is maintained by the OMG; related standards include BPEL and BPMN. Any acronym can be set inline with REST or HTTP.

Corresponding L^AT_EX code of ./paper.tex

```

1155 æEuÛöŦ
1156 The \UML is maintained by the \OMG; related standards include
      ↪ \BPEL and \BPMN.
1157 Any acronym can be set inline with \initialism{REST} or
      ↪ \initialism{HTTP}.

```

4 Conclusion and Outlook

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.
